ARTICLE II. - SOLID WASTE DISPOSAL AND RECYCLING SERVICE

DIVISION 1. - GENERALLY

Section 40-31. - Intent, purpose.

- a) The township board finds that solid waste collection and recycling would be more appropriately undertaken at this time by the private sector rather than by way of direct public involvement. The board further finds, however, that the business of solid waste collection and recycling affects public health, safety and general welfare of the township. Thus, in order to protect the public health, safety and general welfare and to prevent nuisances, it is deemed necessary that the business of solid waste collection and recycling by private persons and entities should be regulated as provided in this article.
- b) It is the purpose of this article to:
 1. Regulate the business of solid waste collection and recycling within the township;
 2. Require licensure for the conduct of such business within the township and to require the payment of fees to offset the administration of this article;
 3. Provide minimal standards for licensees in the operation of such business;
 4. Provide for the revocation of licensure; and
 5. Require the delivery of recyclable materials to licensed waste haulers for processing from all sites of generation in the township.
- c) The township board finds that long-term protection and preservation of the public health, safety and welfare requires that a program of mandatory recycling must be commenced in the township immediately.
